

Dear Members of the Denny Island Community,

Thank you for taking part in our visioning conversation with Denny Island community members. Not only will your feedback help inform higher-level conversations on good governance for the region, but you will help inform the Central Coast Regional District's priorities and work-plans going into 2018. The results of your feedback will be collated into a report for review by the CCRD Board of Directors during the December 2017 meeting of the Board. We look forward to reviewing the report to better understand what your aspirations for Denny Island are within the scope of mandate the CCRD has to help facilitate achieving your goals.

## **Potential Future Services**

9. For the past several years, the CCRD has been involved in establishing water service to a portion of Denny Island. In 2016, the Denny Island Community determined that solid waste management/recycling and a fire protection service were priorities for the community. In 2016 & 2017 a number of infrastructure and community service issues that need to be addressed were identified in the Governance Study. These included water, transportation (airport), solid-waste management, fire protection, emergency planning, economic development, library, land-use planning, and parks and recreation. How do you feel these issues should be prioritised for your community?

10. A community service, such as domestic water or fire protection, can be provided for a specific area provided the users who would benefit from the service agree to pay for the service. Cost recovery is accomplished through a tax levy or from user fees (or a combination of the two). How much are you willing pay for each of the services you've listed in Question #9?
